

ANNIVERSARY OF THE DISCOVERY OF THE

NOOSPHERE

**We are celebrating the centennial of
the Noosphere to acknowledge and
spread awareness of this powerful
breakthrough.**

ANNIVERSARY OF THE DISCOVERY OF THE

NOOSPHERE

INVITATION TO PARTICIPATE

Human Energy and its strategic partners invite you to participate in celebrating the 100th Anniversary of the Discovery of the Noosphere!

This document provides information about the program for the anniversary celebration and other relevant information.

OBJECTIVE

The main objective of the centennial celebration is to maximize public exposure to:

- **The Noosphere and Third Story as basic concepts**
- **Teilhard de Chardin**
- **Human Energy**
- **A deepened understanding of the Noosphere and Third Story through extended engagement at workshops and the culminating conference.**

MAIN EVENTS

LECTURES

as well as presentations
and courses at universities

WORKSHOPS

with a variety of partner
organizations

CONFERENCE

in the San Francisco
Bay Area

MASTERCLASS

based on our Science of
the Noosphere series

NEW MEDIA

about the history, origin,
and development of the
Noosphere and Third Story

PUBLIC RELATIONS

press release, social
media, and digital
marketing campaigns

WHO WE ARE

WHO WE ARE

Our vision: to see humanity measurable influenced by awareness and knowledge of the noosphere in a way that provides new meaning and direction for individuals and society at large

Our mission: is to share a new scientific perspective introducing the Noosphere and the [Third Story](#) as a source of meaning and orientation for future generations in our ever integrating world.

Our work: Thanks to our team of accomplished scholars, researchers, and consultants, in only 3 years Human Energy has completed multiple scientific and educational research projects, published numerous academic papers, developed a YouTube channel for a multi-part series titled “The Story of the Noosphere”, created an active and engaged Youtube Channel, conducted a series of long-form video conversations with independent scholars around the world titled “Science of the Noosphere”, and created educational modules for a series of courses at several universities.

What is the Noosphere?

The Noosphere is the sphere of thought enveloping the Earth. The word comes from the Greek *noos* (mind) and *sphaira* (sphere). The Noosphere is the third stage of Earth's development, after the geosphere (rocks, water, and air) and the biosphere (all living things).

Why is the Noosphere important?

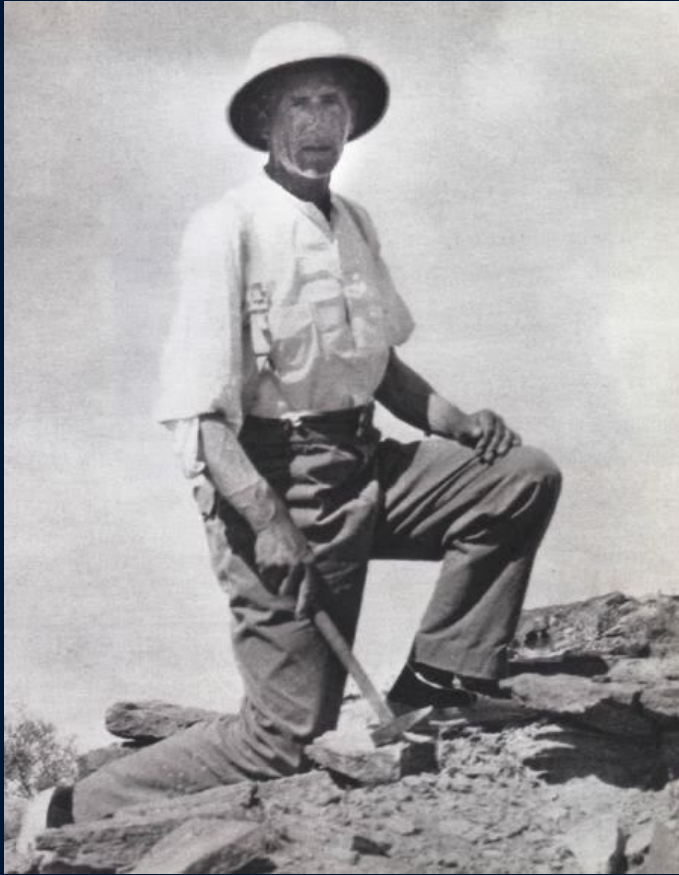

The Noosphere, named by Pierre Teilhard de Chardin, can be understood as the rise of a planetary superorganism integrating all geological, biological, human, and technological activities into a new level of planetary functioning.

Who is Pierre Teilhard de Chardin?

This global consciousness was first named “the Noosphere” 100 years ago by Pierre Teilhard de Chardin, a Jesuit priest and paleontologist, who helped excavate the remains of some of the earliest humans to walk the earth.

In Paris, in the winter of 1923, the Jesuit paleontologist Pierre Teilhard de Chardin and the mathematician and philosopher Edouard Le Roy, were meeting regularly to discuss current issues in modern science, evolution, and religion. They were mutually influenced by Henri Bergson's *Creative Evolution* and by the work of the Russian evolutionary scientist Vladimir Vernadsky. After attending his talk on the biosphere, the complex layer of living things that covered the planet, Teilhard and Le Roy invited Vernadsky to join them in conversation back at Le Roy's apartment. Grappling with a way to name the newest, evolving layer of thought and creativity that emerged from human culture and enveloped the Earth, they looked to the way Greek terms had been used to name the hydrosphere and atmosphere, and, more recently, Vernadsky noted, the biosphere as well. It was Teilhard who suggested that the Greek word for "mind" – *nous*—was the root they needed, and the others agreed. Although several years would pass before the neologism appeared in print, it was on that winter night in Paris, a century ago, that the word "Noosphere" was born.

HOW YOU CAN BECOME INVOLVED

Here are some initial options for collaboration. We are open and adaptable to what works best for your organization.

- **Attend the conference**
- **Host or attend a workshop, lecture or presentation**
- **Watch and share new Anniversary of the Noosphere media**
- ***Additional ideas?***

THANK YOU!

We look forward to meeting with you and finding ways to celebrate together.
